**GREASE JLF PRO**  
125 ml + with sponge applicator

## 1 PRODUCT DESCRIPTION

### COMPOSITION :

- Mixture of waxes, tallow and oils.

### CHARACTERISTICS :

This grease waterproofs, softens and protects articles made of leather: mountain boots, harnesses, security shoes, etc

It prevents and compensates the loss of suppleness of the leather which is due to the influence of exterior agents and avoids hardening and crackles that occur with the ageing of the leather.

## 2 USES

For leather shoes (sport shoes or security shoes) which are subjected to harsh outdoor conditions: rain, snow, mud, cold, impacts, sweat, splashes of various fluids.

## 3 INSTRUCTIONS OF USE

- Apply the grease JLF PRO on the leather surface.
- Rub with the sponge applicator to make the grease penetrate into the leather.
- Remove the surplus of the product to avoid spots on your clothes.

## 4 PRECAUTIONS :

*This product is neither toxic nor dangerous. Nevertheless, as all care and cleaning products, it should neither be ingested nor let within reach of children.*

Storage : Store the well closed recipient in a dry area.
